# Tracks

## 1. Protect our Planet

Step up to **defend our environment against ongoing threats.** This track is for builders ready to tackle pressing challenges like air and water pollution, overflowing waste systems, and the urgent need for biodiversity and ecosystem protection

## 2. Build a Sustainable Future

**Look ahead and proactively redesign our world.** This track challenges you to rethink human infrastructure, optimize resource consumption, and create forward-looking solutions that fundamentally change how we live and build for long-term sustainability.

# Projects are DUE at 5pm!

**Devpost (where you'll submit your project):**
